

ACTIVE DESIGN COMPANY SUMMARY

Company Active Design d.o.o. is predominantly engaged in design and construction of interiors and furniture. It was established in 2006 in Belgrade. Owing to the constant dedication, diligent work and continuous investments in the development of production and management, Active Design is witnessing a constant growth in quality and scope of services and products, as well as solid economic growth. Today, the Company employs 100 people, having a comprehensive factory for furniture production, a design bureau and various showrooms.

Our factory for furniture production includes comprehensive, automated lines for mid-density fiberboard, solid wood and other raw materials' processing in factory facilities of 5000 m² in total. Our mechanical departments include: "CNC" processing centers (5 axes), automatic formatters, edgebanders, painting robot, water curtain spray booth, membrane and hydraulic press, and various working stations for production of specific details.

The design bureau of Active Design Company is dedicated to designing interiors and furniture, as well as designing and supervising the finishing works in construction. It consists of forestry engineers, civil engineers, mechanical engineers and architects.
